

## Engineering 4.0

The Engineering 4.0 App brings the most often used formulas and conversions into the palm of your hand, both in metric and imperial.

Place a virtual Next Turbo blower in 3-dimensions into your bower room with the help of your mobile camera. And make a quick-design of your next blower online.

**Aerodynamic knowledge at the palm of your hand.**

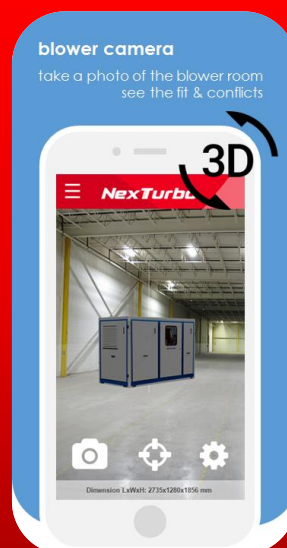

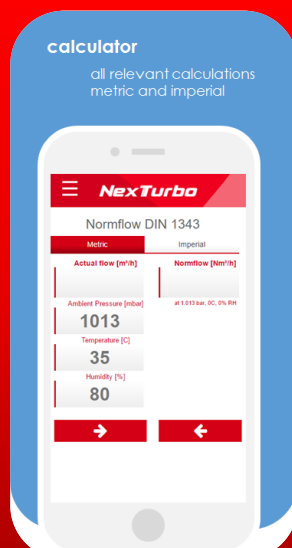

**All tools for an effective planning of aeration systems at the palm of your hand.**

## Your advantages

- 1** **No search for formulas;** all thermo-dynamic and planning-relevant formulas available in one tool
- 2** **A quick evaluation phase;** with a quick design of a fitting compressor
- 3** **Augmented reality check;** investigate the blower fit inside your blower room by pointing your camera at the future installation

made for engineers

## Field Service 4.0

The new free mobile App from the Next-Turbo lab brings the turbo-compressor maintenance to you.

Scan, learn and document your service activities in this easy-to-use Mobile App. Attach photos, fill out checklists and share info with the OEM factory.

**Bring the maintenance of your plant equipment to the next level.**

INSTALLATION ACTIVITIES  
 COMMISSIONING ACTIVITIES  
 REGULAR MAINTENANCE  
 PREVENTIVE ACTIVITIES  
 OPERATION ACTIVITIES  
 FAULT FINDING

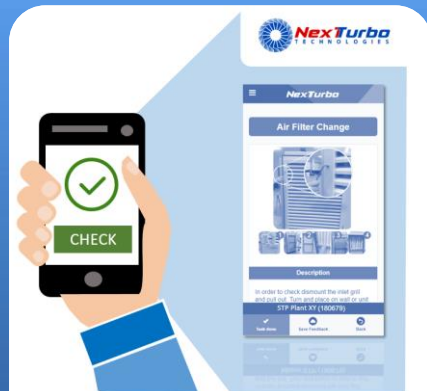

## Your advantages

- 1 No paper checklists;** all your regular maintenance activities are documented in one place
- 2 Increase maintenance quality;** by giving the workforce a clear and easy step-by-step guidance at hand
- 3 Reduce downtime;** by sharing the maintenance history with Suppliers factory – receive feedback, adjusted service schedules and much more.

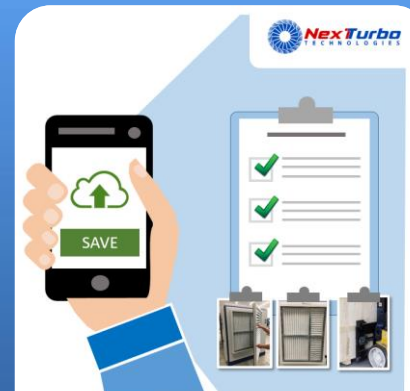

**Take the service back into your own hands**

**Scan component labels and learn how to service them**

**Picture & Video tutorials** for every major operation & maintenance task

**Document the Service history** with checklists and your own photo documentation for every maintenance and service activity

Available on the **App Store**

ANDROID APP ON **Google play**
